Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the third Office Action corresponding to invention election filed Oct 22, 2004. The application contains 20 claims. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

Claims 19 and 20 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on Oct 22, 2004.

Drawings

The drawings filed Feb 22, 2005 have been accepted by the examiner.

Claim Rejections - 35 USC § 103

Claims 1-3, 5-13, and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudolph (Pat No 2,809,002) in view of Kassouni (Pat No 5,407,310). The patent to Kassouni discloses a hanger assembly comprising two slidable connected sections (26, 27) each having a flange (32, 38) with holes for receiving fasteners for securing the hanger between two structural members.

The patent to Kassouni discloses a device comprising threaded members (16, 18) presecured to the device.

Art Unit: 3632

It would have been obvious to one skilled in the art at the time the invention was made to have provided the hanger assembly shown by Rudolph with presecured fastener to facilitate securing the hanger to the structural members by avoiding to look for a fastener and hold it while driving the fastening; it also avoid loosing fasteners while securing the hanger. As to the use of a pilot hole, this practice is well known in the art to facilitate driving a fastener.

Allowable Subject Matter

Claims 4 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed Feb 22, 2005 have been fully considered but they are not persuasive. Nails and screws both are fasteners, and consequently are considered mechanical equivalent.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3632

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
